Air Spring GRB 780 VD

Design: With Viscose Damper

Cover plate and Piston

are made from cast aluminium. Their sealing surfaces are machined, surface quality Rz 16. All other surfaces have been blasted.

Rolling Lobe with Belt

The rolling lobe is made from first class elastomer with a moulded wire-reinforced ring. It shows good vertical and lateral spring properties

Technical data:

Weight:	40 kg
Volume:	30 l
Recommended operation height	
including spacer:	H = 330 mm
Minimum height:	270 mm
Cone plate:	D = 510 mm ø
Piston:	d = 274 mm ø
