

## Pit Cover for MTS K&C Test Systems

The CFM-ITBONA Pit Cover for the MTS K&C test system eliminates the hazardous openings between front axle and rear axle as well as the openings in the wheel instrumentation areas. A drive-on roll cover provides step-less wheel-base adjustment. The areas around the wheel are covered with drop-in aluminum sections. Please call us for more information!

### BEFORE

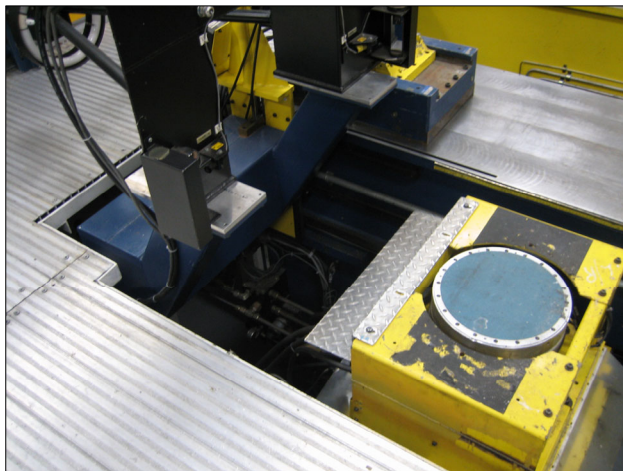

Open area between front axle and rear axle is un-covered and hazardous!

### AFTER

Open area between front axle and rear axle covered with a drive-on roll-cover, safe!

Open areas in the wheel proximity un-covered and hazardous!

Open areas in the wheel proximity covered and safe!
